Summary

Thinking about the Republican primary election for President in 2024, would a candidate who prioritizes ________ be more or less likely to earn your support?

Guaranteeing parents have the right to know what their kids are being taught and have their voices heard concerning what happens in their public schools

Banning permanent sex changing medical procedures and treatments for minors

Protecting minors by requiring age verifications to access pornographic content online

Comprehensive immigration reform, including a pathway to citizenship

Enacting reforms to Social Security and Medicare

Providing funding and military support to Ukraine in its conflict with Russia

Less Likely  More Likely

**Biological Males in Women’s Sports**
As you may know, last year Florida passed the Parental Rights in Education Act into law, which QUOTE “prohibits classroom instruction on sexual orientation or gender identity in kindergarten through 3rd grade.” Now, some lawmakers are calling on the federal government to enact a similar policy nationwide. Would you support or oppose such a law that would prohibit teaching about sexual orientation and gender identity to students in kindergarten through 4th grade classrooms?

Role of Government on Transgender Issues

Decisions over transgender issues – including bans on sex-change procedures for minors, should only be made at the state level, not the federal level.

There is a role for both the federal government and state governments on transgender issues.

Transgender issues are too far-reaching and connected to federal civil rights law to be left to the states. Congress must step in to protect minors and ban permanent sex-change procedures.

Please tell me if you agree or disagree with the following statement. Many Republican elected officials have given up too much ground in national debates on culture war issues, especially when it comes to parental rights and the education of children.
Big Tech
As you may have heard, there is a national debate about Big Tech companies like Google, Facebook, and Twitter, and whether they should be allowed to censor political speech online. Some have proposed that Congress should pass legislation to prevent this type of political censorship. Would you support or oppose this type of law?

Please tell me if you agree or disagree with the following statement. Big Tech companies like Google, Apple, Facebook, and Amazon, are too powerful and have too much control over consumers and our economy. Congress should prioritize legislation that modernizes antitrust enforcement to rein in the power of these Big Tech companies.
A recent survey found that the average American kid is first exposed to online pornography at age 12. Now, some lawmakers are proposing legislation to require online porn companies to verify the age of their users. This would mean that a user would need to provide a government-issued ID demonstrating that they are 18 or older in order to access online pornography. Would you support or oppose a national age verification requirement to access pornographic content online?
